INDEX TO VOLUME XXII.*

A

Abbott, C. C., Primitive Industry, 401.
Acid, nitrous, in evaporation of water, 145.
pentathionic, 73.
Agassiz, A., Hæckel's Medusæ, 160.
Echini of the "Blake," 413.
Anthracite mining, 152.
Arctic observations, 164.
Arsenic, spectrum of, *Huntington*, 214.
Arsenobenzene, 71.
Association, American, Cincinnati meeting, 86, 240.
British, Lubbock's address, 268,343.
Aurora of Sept. 12–13, 1881, *Schœberle*, 341.

B

Bailey, W. W., Botanical Collector's Handbook, 326.
Barker, G. F., chemical abstracts, 71, 145, 217.
international congress of electricians, 395.
Barometric observations, reduction of, *Loomis*, 1.
Bases, new organic, 219.
Bean, T. H., fishes of the New England coast, 295.
Bell, A. G., a modification of Wheatstone's microphone, 87.
Bells, ancient Japanese bronze, 326.
Berthelot, spontaneous oxidation of mercury, 217.
Birds, Jurassic, see GEOLOGY.
Blake, W. P., vanadinite in Arizona, 235.
ulexite in California, 323.
vanadates of lead at Castle Dome mines, Arizona, 410.
Boron hydride, 147.
Boss, L., comet *b*, 1881, 140.
tail of comet *b*, 1881, 303.
Boston Society of Natural History, 85.
BOTANY—
Algæ, New England, 158.
Alismaceæ, 236.
Corallines of Naples, 325.
BOTANY—
Cucurbitaceæ, 237.
Ferments, alcoholic, 492.
Fungi, morphology and physiology of, 324.
Spongiophagus Carteri, 493.
See further under GEOLOGY.
Bouvé, T. T., Boston Soc. Nat. Hist., 85.
Braithwaite, R., British Moss Flora, 239.
Broadhead, G. C., Carboniferous rocks of Kansas, 55.
Brooks, W. K., Development of the Squid, 414.

C

Cadmium, atomic weight of, 148.
Campbell, J. L., dufrenite from Rockbridge Co., Va., 65.
Carbon disulphide, purification of, 147.
Carpenter, P. H., Report on the Comatulæ, 413.
Chemical Society, American, 165.
Cipher-code for astronomical telegrams, 245.
Climate of western United States, 247.
secular changes of, *McGee*, 437.
Coal-dust, danger from, in mining, *Hovey*, 81.
Coan, T., volcanic eruption in Hawaii, 227, 228, 322.
Cold from reaction of solids, 206.
Comet *b*, 1881, observations of, *Boss*, 140, 303, *Burton*, 163, *Christie*, 164, *Harkness*, 137, *Holden*, 260.
photographs of spectrum of, 134, 163.
polarization of light of, *Wright*, 142.
spectroscopic observations of, 135, 137, 164.
tail of, *Boss*, 303.
c, 1881, polariscopic observations of, *Wright*, 372.
Comstock, C. B., variation of a zinc bar at the same temperature, 26.
Conductivity of metals, 316.
Cooke, J. P., Principles of Chemical Philosophy, 398.

* This Index contains the general heads BOTANY, GEOLOGY, MINERALOGY, OBITUARY, ZOOLOGY, and under each the titles of Articles referring thereto are mentioned.

Cooper, T., jelly-like mineral resembling dopplerite, 489.
Cope, E. D., arrangement of the Perissodactyles, 163.
Eocene saurian and mammals, New Mexico, 408.
Miocene Rodents and Canidæ of the Loup Fork, 408.
Cosmos les Mondes, 494.
Cyclones, tornadoes and waterspouts, *Ferrel*, 33.

D

Dall, W. H., Report on the Mollusca, 413.
Dana, E. S., emerald-green spodumene, 179.
Dana, J. D., appendages of trilobites, 79.
limestone of Westchester Co., 103, 313, 327.
iron ore of Rhode Island, 152.
doleryte of eastern N. America, 230.
iron ores of Marquette, 320, 402.
"Kames" of the Connecticut River Valley, 451.
Darwin, G. H., stresses caused by continents and mountains, 317.
Daubrée, substances from "forts vitrifiés," 150.
Dawson, G. M., geology of British Columbia, 75.
Dawson, J. W., structure of Uphantaenia, 132.
De Bary, A., Morphologie und Physiologie der Pilze, 324.
De Candolle, Monographiæ Phænogamarum, 235.
Dextrose, transformation of into dextrin, 72.
Dodge, W. W., Lower Silurian fossils in Maine, 434.
Draper, H., photographs of spectrum of comet of June, 1881, 134.
Dust, so-called cosmical, 86.
Dutton, C. E., arid climate of Western United States, 247.
Dynamo-electric machines, 484.

E

Earle, J., English Plant Names, 491.
Earth, stresses in interior of, 317.
Earthquakes, Japanese, *Rockwood*, 468.
Eaton, D. C., Farlow's New England Algæ, 158.
Ebonite, transparency of, 148.
Elasticity and motion, 396.
Electric absorption of crystals, 147.
machines, 484.
Electrical exhibition, Paris, 395.
Electricity, conservation of, 74, 148.
storing of, 75.
transmission of power by, 397.
see also *Voltaic arc*.
Electro-dynamic balance, 398.
Elevation, see *Height*.
Entomological Commission, Bulletin, 415.
Ether, motion of, *Michelson*, 120.
Etheridge, R., Presidential Address, 410.

F

Farlow, W. G., botanical notices, 324, 492.
Marine Algæ of New England, not., 158.
Faxon, W., articles on Crustacea, 414.
Ferrel, W., cyclones, tornadoes and waterspouts, 33.
Fewkes, J. W., articles on marine invertebrates, 413, 414.
Fluorine, free, in fluor spar, 71.
Ford, S. W., embryonic forms of trilobites, 250.
Forts vitrifiés, materials from, 150.
Fossil, see GEOLOGY.
Fraunhofer lines, see *Spectrum*.
Fusion, modes of, 220.

G

Gabb, W. M., Caribbean Miocene Fossils, 77.
Garman, S., New Reptiles and Fishes, 162.
GEOLOGICAL REPORTS AND SURVEYS—
Alabama, 80.
Indiana, 78.
New Jersey, 77.
Pennsylvania, 78, 152, 485.
Rocky Mountains (Powell), 399.
Territories (Hayden), 408, 409.
United States, King's, 487.
GEOLOGY—
Alps, Apuan, 488.
Alteration of superficial deposits, 80.
Alveolites, *Thomson*, 235.
Anthracite mining, 152.
Birds, Jurassic, and their allies, *Marsh*, 337.
Black Hills, 399.
Brazos coal-field, Texas, 152.
British Columbia, 75.
Carboniferous of Kansas, *Broadhead*, 55.
Caribbean Miocene fossils, 77.
Climate, secular changes in, 437.
Cortlandt series, *Dana*, 103.
Cosmical dust, so-called, 86.
Cyathophycus, *Walcott*, 394.
Deer horns, impregnated with tin ore, 81.

GEOLOGY—
Devonian plants, *Dawson*, 233.
Dictyophyton, *Whitfield*, 53, 132.
Diluvium, gray and red, 80.
Dinoceras, restoration of, *Marsh*, 31.
Doleryte of N. J. and Conn., 230.
Dust, cosmical, 86.
Felsites, etc., near Boston, 80.
Glacial action in Pennsylvania, 486.
drift, Mt. Ktaadn, 229.
in New Jersey, 77, 401.
ice-sheet, thickness of, *McGee*, 264.
subsidence produced by, *McGee*, 368.
Glaciers, illustrations of, 78.
Glacier scratches, Goshen, Conn., 322.
Grezzoni of Italy, 488.
Gulf of Mexico, Tertiary of, *Hilgard*, 58.
Ice sheet, subsidence produced by, *McGee*, 368.
Irish Elk, deposits containing, 408.
Iron ores of Marquette district, 320, 402, 403.
of Rhode Island, 152.
Jurassic birds and their allies, *Marsh*, 337.
Kansas, Carboniferous in, *Broadhead*, 55.
Kames of the Connecticut River Valley, *Dana*, 451.
of Maine, *Stone*, 487.
Laccoliths, Ireland, 152.
Lake Erie, preglacial outlet of, 151, 486.
Lake-basin, Tertiary, of Florissant, 409.
Laramie group, New Mexico, *Stevenson*, 370.
Limestone of Westchester Co., *Dana*, 103, 313, 327.
Maine, Lower Silurian fossils in, 434.
Kames of, *Stone*, 487.
Mammals, Eocene of New Mexico, 408.
Minas Geraes, Brazil, 221.
Mt. Ktaadn, glacial drift on, 229.
New Jersey, geology of, *Cook*, 77.
Norway, terraces and coast lines, 149.
Noryte, analysis of, 104.
Oil regions of Penn., 78.
Plants, Devonian, *Dawson*, 233.
Lignitic, Manitoba, 233.
Silurian of Wales, 153.
Pterygotus, *Pohlman*, 234.
Rodents, Miocene, 408.
Saurian, Eocene, 408.
Staten Island geology, 488.
Stresses caused by continents, 317.
Taconic near Lake Champlain, 321.
Terraces and ancient coast lines, 149.
GEOLOGY—
Tertiary Lake-basin of Florissant, Colorado, 409.
Trap of Eastern N. America, 230.
Trenton gravel, 401.
Trilobites, *Walcott*, 79.
embryonic, *Ford*, 250.
Uphantænia, *Dawson*, 132.
Valleys, old, filled with drift, 486.
Vertebrata, Permian of Texas, *Cope*, 153.
Westchester Co. limestone, *Dana*, 103, 313, 327.
Glaciers, etc., see GEOLOGY.
Gray, A., botanical notices, 235, 491.

H

Hæckel, E., Medusen, noticed, 160.
Hall, A., Double Star Observations, 84.
Hansen, E. C., on alcoholic ferments, 492.
Harger, O., New England Isopoda, 411.
Harkness, W., comet *b*, 1881, 137.
solar parallax, 375.
Hawaii, volcanic eruption in, 226, 322.
Hawes, G. W., doleryte of Eastern N. America, 230.
Height of signal service stations, 18.
Hesperidin, 218.
Hidden, W. E., mineral localities in North Carolina, 21.
North Carolina emeralds, 489.
Hilgard, E. W., Tertiary of the Gulf of Mexico, 58.
soil analyses, 183.
Cotton Production of Louisiana, 245.
Hitchcock, D. H., volcanic eruption in Hawaii, 228.
Holden, E. S., light of telescopes used as night-glasses, 129.
comet *b*, 1881, 260.
Hovey, H. C., danger from coal-dust in mining, 18.
Huntington, O. W., atomic weight of cadmium, 148.
spectrum of arsenic, 214.

I

Ice, heating of, 148, 220.

J

Jenney, W. P., Geology of the Black Hills, 399.
Jolly's hypothesis as to cause of variations of oxygen in the air, 429.

K

Ketines, 219.
King, C., Report of U. S. Geological Survey, 487.

L

Lasaulx, so-called cosmical dust, 86.
Lavallée, A., Arboretum Segrezianum, 238.
Light, velocity of, 316.
see also *Polarization*.
Liquefaction from reaction of solids, *Walton*, 206.
Liversidge, A., torbanite of New South Wales, 32.
Loomis, E., meteorology, 1.
Lubbock, presidential address, 268, 343.

M

Magnetic observations in Davis Strait, *Sherman*, 49.
Magnetization of iron and steel, 398.
Mallett, J. W., crystalline form of sipylite, 52.
Mark, E. L., on development of Limax campestris, 494.
Mars, ephemeris of satellites of, 485.
Marsh, O. C., restoration of Dinoceras, 31.
Jurassic birds and their allies, 337.
McGee, W. J., thickness of ice-sheet at any latitude, 264.
local subsidence produced by an ice-sheet, 368.
secular climatal changes, 437.
McMaster, J. B., Bridger Beds, 235.
Melting, modes of, 220.
Mercury, distillation of in vacuo, *Wright*, 479.
oxidation of, 217.
Metallic vapors, reversal of lines of, 220.
Meteoric iron, new, *Shepard*, 119.
dust, 86.
Meteorology, contributions to, *Loomis*, 1.
Michelson, A. A., relative motion of the earth and luminiferous ether, 120.
Microphone, *Bell*, 87.
Miller, S. A., North American Mesozoic and Cenozoic Geology, 234.
Milne-Edwards, A., Crustacea of the "Blake," 413.
Minerals, optical characters and crystalline system of, 153.
separation of, 80.
MINERALS—
Æschynite, 23.
Alaskaite, 491.
Annerodite, 490.
Arctolite, 156.
Beryls, North Carolina, 24, 489.
MINERALS—
Brackebuschite, 157.
Chalcomenite, 155.
Chrysolite, 152.
Crocoite, 198, 203.
Cryoconite, 86.
Dawsonite, 157.
Descloizite, 201.
Dopplerite, mineral resembling, 489.
Dufrenite, 65.
Dumortierite, 157.
Emeralds, 489.
Fredricite, 156.
Frigidite, 156.
Hiddenite, 179, 489.
Ilesite, 490.
Itabirite, 222.
Lautite, 155.
Limonite, 488.
Microlite, 82.
Mimetite, 202.
Monazite, 21, 22.
Orthoclase, artificial, 491.
Platinum, 25.
Quartz crystals, 23.
Samarskite, 23.
Schneebergite, 156.
Semseyite, 490.
Serpierite, 156.
Sipylite, 52.
Spodumene, emerald-green, 179, 489.
Thenardite, 204.
Torbanite of New South Wales, 32.
Tritochorite, 155.
Turquois of New Mexico, 67.
Tyreeite, 156.
Ulexite, 323.
Uraninite, 22.
Vanadinite, 198, 235.
Vauquelinite, 198, 203.
Volborthite, 201.
Wollongongite, 32.
Wulfenite, 198, 203.
Zincalluminite, 490.
Morley, E. W., cause of variations in the amount of oxygen in the air, 417.
on Jolly's Hypothesis, 429.
Morse, E. S., changes in Mya and Lunatia, 323, 415.
worked shells in New England shell-heaps, 323.
ancient Japanese bronze bells, 326.
Mountains, stresses caused by, 317.

N

Newcomb, S., Transit of Venus, 84.
Newton, H., geology of Black Hills, 399.
Newton, H. A., astronomical notices, 84, 416.
obituary of Benjamin Peirce, 167.

Niagara Falls as a source of energy, 397.
Nichols, electrical resistance of incandescent platinum, 363.
Nicholson, H. A., Structure and Affinities of Monticulipora, 322.
North Carolina mineral localities, *Hidden*, 21, 489.

O

OBITUARY—
Delesse, Achille, 166.
Deville, E. H. St. C., 166.
Linnarsson, G., 416.
Peirce, Benjamin, 167.
Observatory, U. S. Naval, observations at, in 1876, 416.
Ohm, value of the, 484.
Osborn, H. F., Loxolophodon and Uintatherium, 235.
Oxidation, spontaneous of metals, 217.
Oxygen, variations in amount of in the air, *Morley*, 417, 429.
Ozone as a cause of the luminosity of phosphorus, 145.

P

Packard, A. S., The Hessian Fly, 415.
Pettersen, K., terraces and ancient coast-lines, 149.
Photographs of spectrum of comet, 134, 163.
Planets, figures of, 82.
Plants, see BOTANY and GEOLOGY.
Platinum, electrical resistance of, *Nichols*, 363.
Poggendorff, J. C., Dictionary of the Exact Sciences, 245.
Pohlman, J., Pterygotus, 234.
Polarization of heat rays, change of plane of by electro-magnetism, 397.
of light of comets, 137, 142, 372.
rotation of plane of by earth's magnetism, 484.
Polar stations, international, 164.
Pritchett, H. S., ephemeris of satellites of Mars, 485.
Prudden, T. M., Manual of Histology, 414.

R

Radiophonic researches, *Bell*, 87.
Reyer, E., Zinn, noticed, 157.
Rockwood, C. G., notes on earthquakes, 289.
Japanese seismology, 468.
Rood, O. N., obtaining and measuring very high vacua, 90.

S

Satellites of Mars, ephemeris of, 485.
Schaeberle, J. M., aurora of Sept. 12–13, 1881, 341.
Scudder, S. H., Butterflies, noticed, 239.
Tertiary lake-basin of Florissant, 409.
Seismology, Japanese, *Rockwood*, 468.
Selenium, microphonic action of, 317.
Shaler, N. S., Illustrations of the Earth's Surface, noticed, 78.
Shells, worked, in New England shell-heaps, 323.
Shepard, C. U., a new meteoric iron, 119.
Sherman, O. T., magnetic observations in Davis Strait, 49.
Silliman, B., turquois of New Mexico, 67.
mineralogical notes, 198.
Smith, J. L., collection of minerals, 166.
Smith, S. I., Prudden's Histology, 414.
articles on Crustacea, 412.
Smithsonian Inst. Report, 165.
Soil analyses, *Hilgard*, 183.
Solar, see *Sun*.
Solids, cold from reactions of, 206.
Solms-Laubach, Corallina, 325.
Sound, intensity of, 219.
Sound-waves in organ pipes, 316.
Specific gravity, separation of minerals by, 80.
Spectroscopes, efficiency of, 397.
Spectrum of arsenic, 214.
see also *Comet*.
Spectrum-lines of metallic vapors, reversal of, 220.
photometry of, 219.
Spencer, J. W., preglacial outlet of Lake Erie, 151, 486.
Sprengel pump, *Rood*, 90.
Stars, photography of, 75.
Stereoscope, *Stevens*, 358, 443.
Stevens, W. LeConte, the stereoscope, 358, 443.
Stevenson, J. J., Laramie group of Southern New Mexico, 370.
Stockwell, J. N., Theory of the Moon's Motion, 415.
Stone, G. H., the kames of Maine, 487.
Stresses caused by continents and mountains, 317.
Sun, parallax of, *Harkness*, 375.

T

Telescopes used as night-glasses, *Holden*, 129.
Temperature variations of a zinc bar, *Comstock*, 26.
Thomson, J., Alveolites, Amplexus and Zaphrentis, Scotland, 235.
Tornadoes and waterspouts, *Ferrel*, 33.
Trowbridge, J., physical notices, 74, 147, 219, 316, 396, 484.

Tucker, J. H., Manual of Sugar Analysis, 398.

V

Vacua, obtaining and measuring of high, *Rood*, 90.
Verrill, A. E., fauna of outer banks, 292.
recent papers on marine invertebrata of Atlantic coast, 411.
Cephalopods from Steamer Blake, 162.
Vision by optic divergence, *Stevens*, 358, 443.
Volcanic eruption in Hawaii, 226, 322.
Voltaic arc, inverse electromotive force of, 74.

W

Wachsmuth and Springer, Palæocrinoidea, 494.
Wadsworth, M. E., iron ores of Marquette, 320, 402, 403.
Walcott, C. D., on Cyathophycus, 394.
The Trilobite, 79.
Walton, E. M., liquefaction and cold from reaction of solids, 206.
Warming, E., Podostemaceæ, 492.
Waterspouts, tornadoes and, *Ferrel*, 33.
Weather warnings, 75.
Webster, H. E., Annelida Chætopoda of of New Jersey, 414.
Whitfield, R. P., nature of Dictyophyton, 53, 132.
Williams, H. S., Life History of Spirifer lævis, 153.
Wilson, E. B., Reports on Pycnogonida, 412, 413.
Wilson, E. L., Photographics, not., 73.
Wright, A. W., polarization of light from comet *b*, 1881, 142.
polariscopic observations of comet *c*, 1881, 372.
distillation of mercury in vacuo, 479.

Y

Young, C. A., spectroscopic observations of comet *b*, 1881, 135.

Z

Zinc bar, variations of, *Comstock*, 26.
ZOOLOGY —
Fauna of outer banks, 292.
Fishes of New England coast, 295.
Invertebrates, marine, recent papers on, 411.
Lunatia, changes in, *Morse*, 323, 415.
Medusæ, 160.
Mya arenaria in California, 82.
changes in, *Morse*, 323.
Rhizopods as food of fishes, 82.
Sponge-spicules, organism penetrating, 493.
